

INNOVATION IN REFRIGERATION

# Constant Clear Merchandising

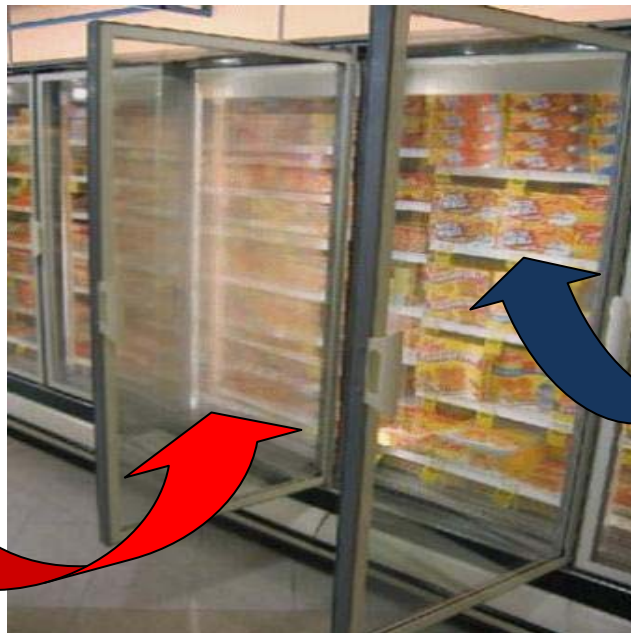

## New Maslen Anti-Fog Film for Chiller & Freezer Glass Doors

Exclusively Distributed by Maslen Technology Australia

The New Maslen Anti-Fog film is a patented, internally fitted polyester film that **provides clear product presentation**. Excellent for use in all glass display refrigerated merchandisers, such as those found in supermarkets, produce, liquor, bakery, deli, butchers -and convenience stores. Maslen FSI film offers long-term anti-fog performance and excellent optical clarity. Typical applications are refrigerated/freezer glass door and glass display / servery cases.

### Benefits

- Increase sales due to continuous product visibility (Clear Internal Glass)
- The internal display glass remains clear even during defrost
- Suitable for both Air Conditioned and non-Air Conditioned applications
- Easily retrofitted to existing displays
- Easy to maintain
- Long term solution
- Cost effective
- Suitable for all applications
- Available in a wide variety of sizes
- Customised to suit your specific needs

Heated glass in a low-temp freezer merchandiser **without** Anti-Fog Film

Unheated glass in a low-temp freezer merchandiser **with** Anti-Fog Film Fitted

Anti-Fog film is designed / engineered for inside glass doors / panels only. (It is not suitable for external glass applications)  
Optimum performance is achieved at 25°C / 60%RH store conditions

### Dew Point Control Package

- Significant **reduction** in energy costs, when Anti Fog Films is incorporated with our recommended **Dew Point Control Package**. Standard low temp glass door may offer savings of up to \$260.00 /year/door in operating cost. (Savings based on \$0.14/kw-h)
